Hi! I am an experienced Rust developer and have professional C++ experience. Seeking a remote systems programming role where strong systems knowledge, a focus on memory safety, and performance optimization experience contribute to building reliable and efficient software. I am open-minded about using LLM (AI) for improving productivity.

WORK EXPERIENCE

Tradetech

Apr 2024 — Apr 2025

Software Engineer

St Petersburg City, Russia

- Async Rust with Tokio.
- Designed and built a scalable, distributed traffic limiting system to enforce monthly and daily usage limits based on client subscription plans. Utilizing PostgreSQL.
- Implemented an extensive integration with Paddle and Stripe payment gateways: individual purchases, subscription upgrades/downgrades with compensation. Utilizing Axum, Sqlx and PostgreSQL.
- Developed a Solana blockchain slippage estimation service, analyzing on-chain events from Pump.fun, Raydium, and other platforms. Utilizing PostgreSQL, Sqlx, RabbitMQ and Google PubSub.
- Mentored a junior engineer.

Tradetech

Oct 2021 — Oct 2023

Junior Software Engineer

St Petersburg City, Russia

- Async Rust with Tokio.
- Developed a service for monthly reporting (via email) on exchange accounts activity to the regulatory authority. Tracking metrics like trading volume, RPNL, and UPnL for selected period. Sourcing data from all around the system utilizing gRPC, Clickhouse and Kafka.
- Build a logging system: capture every user request+response without an impact on the normal request flow. Utilizing Clickhouse.
- Implemented leader service election utilizing HashiCorp Consul.
- Support for Solana payment gateway service ensuring data integrity in cases of power outage (when graceful shutdown is not possible).
- Developed a CRUD service for all kinds of entities utilizing Actix Web, Sqlx, PostgreSQL and Clickhouse.

Wargaming

May 2021 — Aug 2021

Software Engineer Intern

St Petersburg City, Russia

- C++. 3D Model mesh optimization research.
- Python. Bug fixes.

PROJECTS

Current Location

Oct 2025 — Present

A tool for sharing “current-working-file” between various tools for better integration between them.

Smart Poselok Backend Developer

Apr 2022 — Jun 2022

Management system of suburban settlements with an extensive role-based access control system.

Rustenger

Jan 2020 — May 2020

Simple messenger using Rust and Tokio

EDUCATION

Институт среднего профессионального образования СПбПУ

May 2022

Bachelor, Information Technology

SKILLS & INTERESTS

- **Languages:** Russian (Native Speaker), English (B2)
- **Programming Languages:** Rust (expert), C++, Lua, Clojure, Nix
- **Soft Skills:** Technical mentoring, Self-directed learning, Agile, Scrum
- **Software Development:** Code Review, TDD, DDD
- **Ops:** Linux, HashiCorp Consul, Nix (OS, PM, DSL)
- **FinTech:**
- **Interests:** Open Source
